2. Definitions

Spread is the difference between the buy/ask price and the sell/bid price of a particular trading instrument.

Swap/Rollover is the process of extending the settlement date of an open trade (i.e. moving/rolling over an open trade from one trading day to the next trading day). 3. Types of Costs and Associated Charges

3.1. Spread

The Company charges variable Spreads for CFDs on Commodities, Currencies (Forex), Indices and Metals depending on your account type. For CFDs on Stocks, Cryptocurrencies and ETF the Company charges fixed Spreads depending on your account type.

Spread Calculation Formula = Lots * Contract Size * Spread

Example based on Performance Scenario

You are trading a long position of 0.01 LOT on EUR/USD. The contract size is 100,000. The current BID price is 1.18440 and the ASK price is 1.18480. The difference between the ASK and the BID price is called “spread”. Therefore, the spread is 0.0004 (4 pips) which equals to 0.40 USD as the spread value is determined by the Quote or Profit currency.

This is calculated based on the formula given above: $0.01 * 100,000 * 0.0004 = 0.40$ USD. The Spread amount calculated in EUR, $0.40 \text{ USD} / 1.18440 = 0.34$ EUR.

3.2. Swap/Rollover

The Swap amount is a constant percentage of the position value and is based on a number of factors including among others, the position taken (i.e short/bid or long/ask), position size, interest rates, underlying asset, daily price fluctuations and other economic and market related factors.

TradeEU calculates and charges an overnight Swap fee for all positions held open after 21.00 GMT (Cyprus Time). From Thursday to Tuesday, for each day of the week that a position is rolled over, Swaps are charged only once. Only on Wednesday, Swaps are charged 3 times for all positions kept open over the weekend.

Calculation Formula:

-->Number of LOTS * Contract Size * Decimals * Swap Charge in points * Number of nights / exchange rate

**** SWAP is calculated in the denominated currency of each asset or in the case of Forex pairs in the Quote or Profit currency and converted in the account's currency.**

For the below examples let's assume that the client has a EUR account currency:
